

## ITC Case Study Data Documentation

### Sheet 1:

This sheet provides generic data about the customers that purchase our cleaning products.

### Sheet 2:

This sheet provides information about specific health inspections at the customers establishment.

AuditDuration is recorded in minutes

PFFlag = Pass/Fail Flag refers to if the establishment passed that health inspection.

P## columns refer to the most recent shipments of supplies sent out by the Client to their customers. The value in each cell is the number of cases of cleaning supplies purchased and sent out during that deliver cycle.

### Sheet 3:

Refers to shipments made to each customer
